

Repository Checklist

Progress: 16/22 (72%)

- `design_docs/godmode_overview.md`
- `design_docs/dashboard_spec.md`
- `design_docs/businesses_plan.md`
- Rebuilt HUD screens (Home, Streams, Agents, Logs/Memory, Settings) in `hud/index.html`.
- Added `/hud/*` API endpoints (structured data + placeholders).
- Documented canonical HUD strategy.
- B1 landing endpoints (`/funnels/b1`, `/funnels/b1/landing`) + config file.
- `docs/revenue_funnel_1.md` w/ customization steps.
- Promo scripts/hooks tracked under funnel template + `docs/b1_promo_sprint.md`.
- JSONL ledger (`finance/ledger.jsonl`) + API endpoints + CLI (`scripts/record_revenue.py`).
- Health script (`scripts/check_ledger_health.py`) + fixer playbook.
- HUD metrics fed by `/finance/summary`.
- B2 ecommerce scaffolding (`businesses/b2_ecom_holiday/`).
- B3 content pipeline research (`docs/b3_traffic_research.md`).
- B4 AI service offer template (`businesses/b4_ai_service/`).
- JSONL vector memory + `/memory/*` endpoints + ingestion CLI.
- Upgrade to Qdrant + richer embeddings (requires future budget).
- Bootstrap scripts for new worker nodes.
- Multi-node task/log storage.
- Automated failover once redundant servers are funded.
- Add a recurring "Self-review: reconcile plans vs implementation" task to the roadmap/tasks.
- Implement a self-improvement planner agent goal that:
